Debris Removal Operations Suspended During Storm Event

VENTURA, California – Due to the potential for significant rainfall with the anticipated storm events and mandatory evacuations in many of the burn areas, OES/CalRecycle will suspend all fire debris removal activities in the Thomas Fire burn areas. Beginning at noon today, OES/CalRecycle started pulling back crews away from potential flood/debris flow areas. Debris removal teams will resume scheduled debris removal assignments following the storm event. OES/CalRecycle anticipates that the debris removal operations will resume on Monday, March 26, 2018. The Debris Removal Operations Center (DROC) will be closed on Saturday March 24, 2018.
